

Wind Turbine

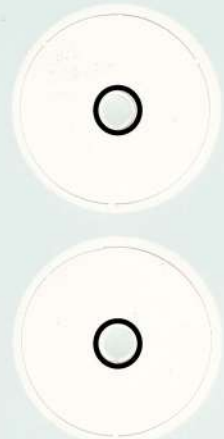

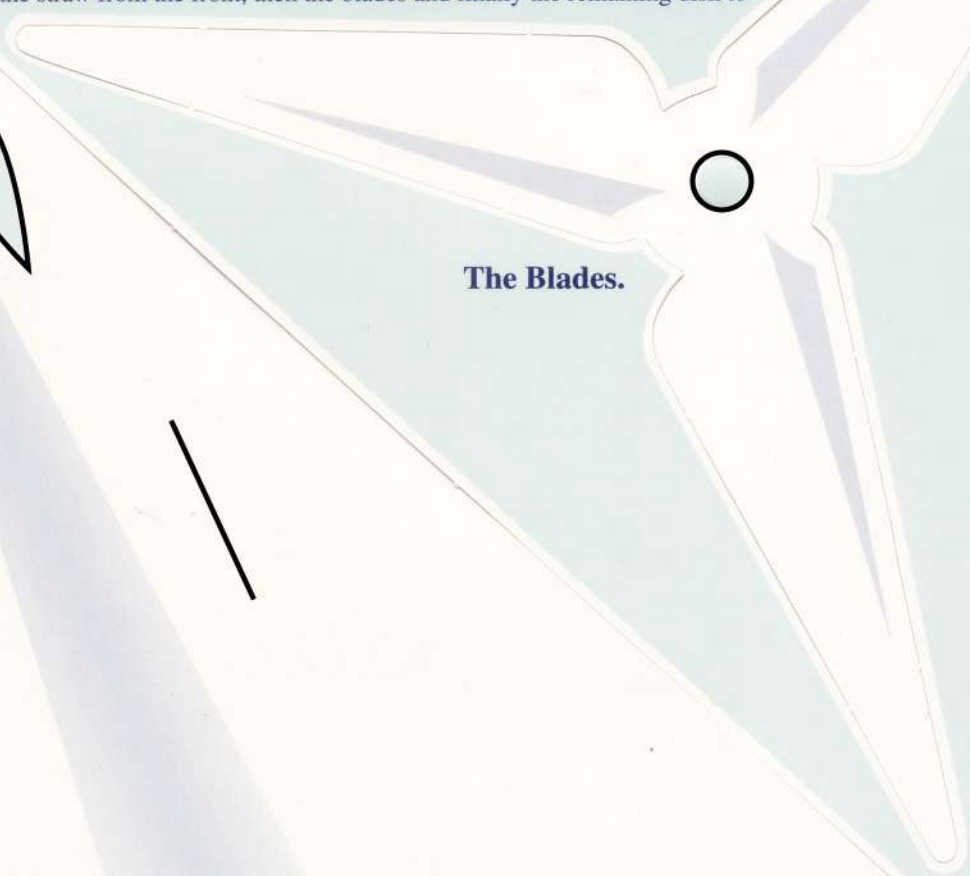

Instructions.

- * No glue is required to construct this model.
 - * Simply press out the 5 shapes and construct the model by following the instructions.
1. Roll the shaft tightly with tabs on the outside. Slip the tabs into the slots.
 2. Place a 6cm length of plastic drinking straw into the hole at the back and top of the shaft.
 3. Fold along the creased line on the Nacelle. Slip the tab into the slot.
 4. Thread the Nacelle over the straw at the back and slot into the Shaft.
 5. Thread one of the disks onto the straw from the front, then the blades and finally the remaining disk to secure the blades.

The Shaft.

The Blades.

The Disks.

The Nacelle.
